### Notes:

- (1) Eligibles are counted if they were eligible for medical services at any time during the year.
- (2) Eligibles are counted if they were eligible for medical services at any time during the month.
- (3) Eligibles are counted if they were enrolled in Medicaid on date of regular issuance of Medicaid cards. This data is used by DMAS to forecast the number of eligibles. The State Population Summary report replaced the MME370 from FY 2005 onwards.
- (4) Data for 1998 on reflects HCFA/CMS -redefined categories of eligibility.
- (5) VaMMIS system modifications have forced substantial counting method changes for FY 2004. The apparent increase in data variability is not thought to be significantly correlated to any actual shifts in expenditure, utilization, or enrollment levels that may have occurred since FY 2003.
- (6) CMS 2082 report series not available and inaccurate at time of publication.  
Data for FY 2005 was generated via SAS. FY 2004 totals are restated to reflect change in data source.  
Data from SAS eligibility file are retroactive therefore totals are as of the publication date printed on this report.
